We are proud creators of  
LGBTQA families

# Our Mission

At Eggspllosion Fertility Clinic, it is our goal to provide fertility services to all individuals without discriminating on the basis of sexual orientation, age, race, or gender. We believe that the beauty of families is in diversity. A baby truly warms a home and every home deserves to feel that warmth and compassion. While we never close our doors to anyone, our staff has been specially trained to work with LGBTQA individuals and couples. It is our responsibility to individualize your experience at Eggspllosion Fertility Clinic with individualized treatment plans, counselors and medical services. Creating your unique family is our top priority!

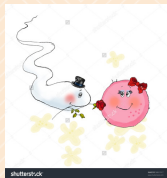

## Services Provided

- Sperm Donation
- Egg Donation
- Surrogacy
- In-Vitro Fertilization (IVF)
- Pre-Implantation Genetic Testing (PGD)
- Tubal Ligation and Vasectomies

# Qualifications

## Egg and Sperm Donation

- 21 years and older
- Any race/religion/sexual orientation
- Anonymous and open donations accepted
  - \*\*Note anonymity may be breached upon serious health problems of child
- Must agree to extensive genetic and health screening
- Must agree to counseling and psychological evaluation
- Equal Compensation for all first-time donors
  - \*\*Note: Egg and sperm donors receive different compensation fees
- Compensation increases with experience and success rate

## Surrogacy

To qualify to be a surrogate:

- 23 years and older
- Must have had at least one successful pregnancy
- Agree to genetic, health, and psychological screening
- Cannot be both egg donor and surrogate for same pregnancy
- Must sign contract relinquishing oneself of engagement after birth
- Must attend counseling and informed consent meetings about all medical procedures and treatments
- Must be above poverty line
- Receive compensation on a trimester basis
- Compensation will be negotiated with both parties

# Qualifications

## In-Vitro Fertilization

- 25 years or older
- Must complete health and psychological screening
- Must attend counseling sessions throughout process
- If sperm or egg donors are involved, must absolve these parties of any future obligations to child
- Must sign contracts with contingencies addressing fate of frozen embryos in case of divorce or severing of relationship
- Unused embryos will be discarded following termination of contract
- Maximum of two embryos implanted at a time
- Will allow for random termination of fetus in the case of multiple pregnancy if desired

## Pre Implantation and Pre-Natal Genetic Testing

- Must have medical indication for testing (have a genetic disease, are a carrier, over age of 35 etc)
- Must attend counseling before, during, and after testing
- Will authorize termination of embryo or fetus in the case of disability if so desired
- Will not authorize testing for sex selection or selection of specific traits

## Tubal Ligation and Vasectomies

- 21 years or older
- Must attend informed consent meeting and sign informed consent documents
- No questions will be asked

# The Steps

1. Call us or visit today to make an appointment. Same day appointments available
2. You will be matched with a counselor trained in egg donation, sperm donation, in-vitro fertilization, prenatal genetic testing, or voluntary sterilization
3. Psychological and health screening will be required for egg and sperm donors, surrogates, IVF recipients, and PGD patients
4. A personalized treatment plan will be discussed and agreed upon. Subsequent counseling sessions and medical appointments will be scheduled.
5. We will guide you through your desired journey

## Our Staff Includes

- Board Certified Reproductive Endocrinologists
- Board Certified Maternal Fetal Medicine Physicians
- Therapists and Psychologists specializing in Infertility and Assisted Reproductive Technologies
- Therapists specializing in working with LGBTQIA individuals
- Lab Technicians trained in ART
- LGBTQIA Activists
- Most advanced technology for egg and sperm retrieval, fertilization, and embryo preservation

# Testimonials

"We longed for a family, a baby to share our hearts with. But everywhere we looked we encountered great discrimination. Who would help two men become dads? The Eggspllosion Fertility Clinic did just that! It filled our home and our hearts with love, love for our 3 year old baby, Evan."

-Dan and Kevin

"Both my husband and I were infertile. Without the Eggspllosion Fertility clinic, our family with our twin baby girls would never have been possible. An egg donor, a sperm donor, and IVF, along with the support of all the staff made our dream family come to life."

-Rebecca

"I always knew I wanted to keep my baby, even if he or she had a significant disability. When I found out my baby had Downs Syndrome from PGD testing offered at The Eggspllosion Fertility Clinic, I was better able to prepare for her birth, to make sure our family would be ready for her."

-Joanne

"I knew from a young age that I did not want children. The Eggspllosion Fertility Clinic allowed me to get a tubal ligation, no questions asked. They reminded me over and over again that this was my personal choice. Voluntary sterilization is as valuable of a choice as IVF. For me, the decision not to become a parent was the right one"

-Jessica

"So the whole turkey baster method was just not working for us. We would get the sperm, put it in, and still not become pregnant. The Eggspllosion Fertility Clinic allowed us to pick our sperm donor and to be inseminated in their office. 9 months later our beautiful Natalie was born."

-Ashley and Lianna
